A new way of living

## PuzerUnconventional

*The refined way to dispose waste*

Pneumatic Refuse Conveying System for an Estate, Town or City

Hide Away Refuse Container. Puzer Compact-Compact Refuse up to a Ratio of 10 to 1. Silence Refuse Chute & Hoppers System

Since the early 20th century, architecture, technology, transportation, art, communication, literature, fashion and even society itself changed radically. The way we lived and worked changed then and continues to change today.

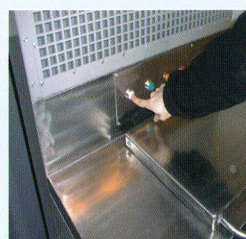

Puzer Unconventional offers a different concept of waste disposal system without changing the way an ordinary person dispose of waste. You dispose waste like you always do and the Puzer Unconventional system will take care of the rest. It's definitely the premier choice offering a different approach for people who expect a higher standard of living and appreciate a higher level of hygiene and comfort.

## PuzerXmit

*A fantasy? Life without trash.*

Introducing Puzer Xmit. Fully integrated into building infrastructure, the system is waste-sorting made simple. Discarding waste into receptacles which is unobtrusively built into common areas where people would find most convenient to dispose different kinds of waste, be it at home, at work or public places.

Waste disposal at a push of a button

Smart dust bin

With Puzer Xmit, you can do your part in conserving the environment without changing your lifestyle.

# Lifestyle

For People with Extraordinary Expectations

## PuzerPerfect

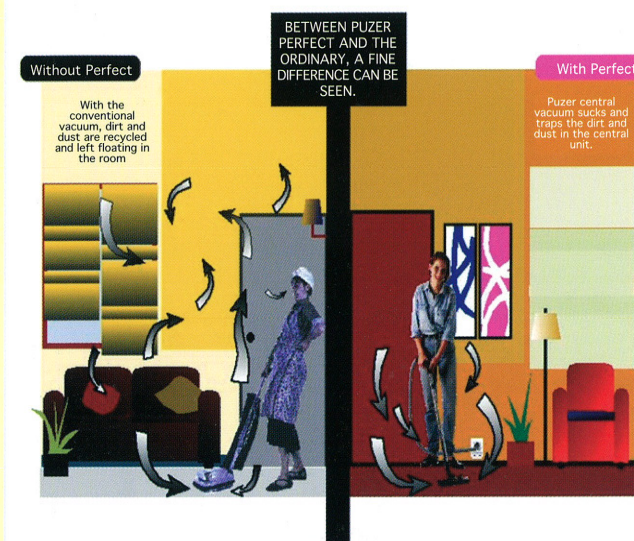

*The hassle free way to perfect cleaning!*

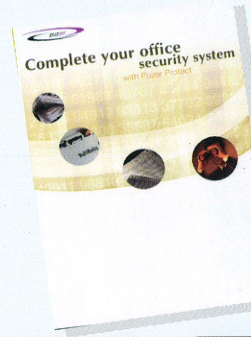

Unlike other cleaning concepts Puzer Perfect does not stir up micro-dust during the cleaning process. Stirred up micro dust not only cause users and occupants to breathe in polluted air during the cleaning process, but also long after it. This is because unremoved micro-dust that has been stirred up takes many hours to settle down again.

Puzer Perfect pick up dust and dirty air through the vacuum cleaning hose, removing it from the surroundings. The dirty air is filtered at a remote location and discharged after filtration is done.

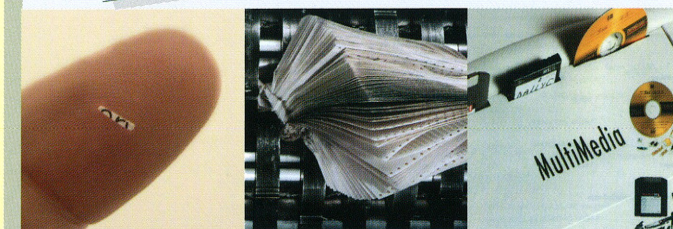

Central Vacuum System is recommended to be incorporated in the Healthy Buildings Design Certified by universities in USA, UK, Finland, etc.

## PuzerProtect

*The missing link in your office security system*

A Typical Shredded Chip

Bulk Shredding

Multimedia shredder

Many people spend millions of dollars protecting their Electronic Data from Hackers, and take for granted that decades old technology such as the shredder is enough to deter Conventional Espionage activities.

The fact is that technology has now made it possible to reconstruct even Cross Shredded Documents from shredded chips as shown with a click of the mouse.

Puzer Protect offers you the most comprehensive, secure and clean solution to the disposal of all your documents.

Shredding becomes a breeze and takes up little time. All you need to do is feed the paper into the machine, and see how fast Puzer Protect shreds and sucks the paper waste away within seconds. For bulk documents, there are bigger shredders where bulky files can be dropped and shredded, thus feeding individual pages is unnecessary.

Don't take security as an afterthought. Security breach is expensive. Put in the missing link in your security system- Puzer Protect System.
